

■ \$PMV: PUMP MIND VIRUS

The Pure Meme Virus
Conviction. Community. Chaos.

ORIGIN

Pump Mind Virus wasn't launched. It escaped. A spark from the trenches where degens chase charts and dopamine like lab rats on caffeine. \$PMV isn't a coin — it's a contagion of conviction. A reminder that the real infection is the grind itself.

THE CONDITION

We all have it — that twitch to refresh Dexscreener. That phantom pump notification. That whisper that says one more buy. \$PMV spreads through belief, community, and chaos. Not by marketing — by mutation.

THE MANIFESTO

- NO CULT — Just conviction.
- NO ROADMAP — Just infection.
- NO PROMISES — Just pressure.
- NO EXIT PLAN — Just persistence.

THE PATHOGEN CYCLE

1. Infection: The first believers spread the meme.
2. Mutation: Art, edits, and content evolve organically.
3. Outbreak: Memes flood the timeline; conviction builds immunity.
4. Pandemic: \$PMV becomes culture, not token.

INFECTIOUS PRINCIPLES

- Organic Growth First — Memes before marketing.
- Culture Over Hype — We infect timelines, not wallets.
- Community Pressure — Every holder a host, every post a symptom.

- Critical Mass — When timing's right, we detonate.

MISSION

Unite the trenches under one virus: conviction. A token that doesn't need a reason — just believers. When others chase narratives, \$PMV builds cult-resistance.

SYMPTOMS

- Obsession with green candles
- Repeated mentions of WAGMI
- Compulsive sharing of \$PMV memes
- Inability to sell
